## Printable Caesar Cipher Wheel

In a cipher wheel, you replace each letter of the message you want to send, with another letter further along the alphabet. You shift the alphabet so it is also called a shift cipher. The key is the number of

# Read Book Cipher Disk

places the alphabet is shifted. For instance, if we use D to represent A, the alphabet has shifted three places.

A cipher disk is an  
enciphering and  
deciphering tool  
developed in 1470 by  
the Italian architect and  
author Leon Battista  
Alberti. He constructed  
a device, consisting of

# Read Book Cipher Disk

two concentric circular plates mounted one on top of the other. The larger plate is called the "stationary" and the smaller one the "moveable" since the smaller one could move on top of the "stationary". The first incarnation of the disk had plates made of copper and featured the alphabet, in order,
