under-standing of the stages of collaboration that community coalitions often experi- ence.

Emerging Theories in Health Promotion Practice and ...
The World Health Organization defines capacity building as “ the development of knowledge, skills, commitment, structures, systems, and leadership to enable effective health promotion ” . It involves actions to improve health at three levels: the advancement of knowledge and skills among practitioners; the expansion of support and infrastructure for health promotion in organizations, and; the development of cohesive partnerships for health in communities .
