Regional Anesthesia in Pediatric Patients: General ...

The Pediatric Regional Anesthesia Network is a collaborative group of institutions and investigators studying the practice, risks and incidence of complications in pediatric regional anesthesia. PRAN was founded in 2007 to study regional anesthetics in infants and children. Starting with 6 pilot sites, we have grown to 21 centers and have prospectively accrued data on over 100,000 pediatric regional blocks.

PRAN Homepage - Pediatric Regional Anesthesia Network

The Pediatric Regional Anesthesia Network contains data on more than 100,000 blocks administered at more than 20 children's hospitals. This study analyzed the risk of major complications associated with regional anesthesia in children. Methods: This is a prospective, observational study of routine clinical practice. Data were collected on every regional block placed by an anesthesiologist at participating institutions and were uploaded to a secure database.
